Our basketball teams had quite a successful season. Both the boys and the girls came through with good records, and gained invaluable experience, which will be helpful to the teams next year. The girls' record for the season was 8 games won and 7 lost; while the boys' team won 7 games and lost 9.

In the Girls' County tournament held at West Des Moines, Johnston lost a close game to Altoona 41-42. The Girls' Sectional was played at Sheldahl. Ankeny defeated Johnston in the first round 34-27.

The Boys' County tournament was held at West Des Moines. Johnston won the first round by defeating Mitchellville 35-30, but in the next round, Ankeny proved too strong and Johnston lost 62-30. In the Boys' Sectional, also held at West Des Moines, Elkhart was an easy victim; Coach Schuler used almost every man on the bench and won easily 37-18. The next game was a battle between Woodside and Johnston. The teams were well-matched and played well; the lead changed many times but Woodside was ahead 2 points when the gun sounded and won 41-39.

FOOTBALL

In summing up the football season of 1947, we find Johnston with a record of 2 wins and 4 losses. This year the team consisted mainly of Juniors and Sophomores, with only 2 Seniors in the line-up.

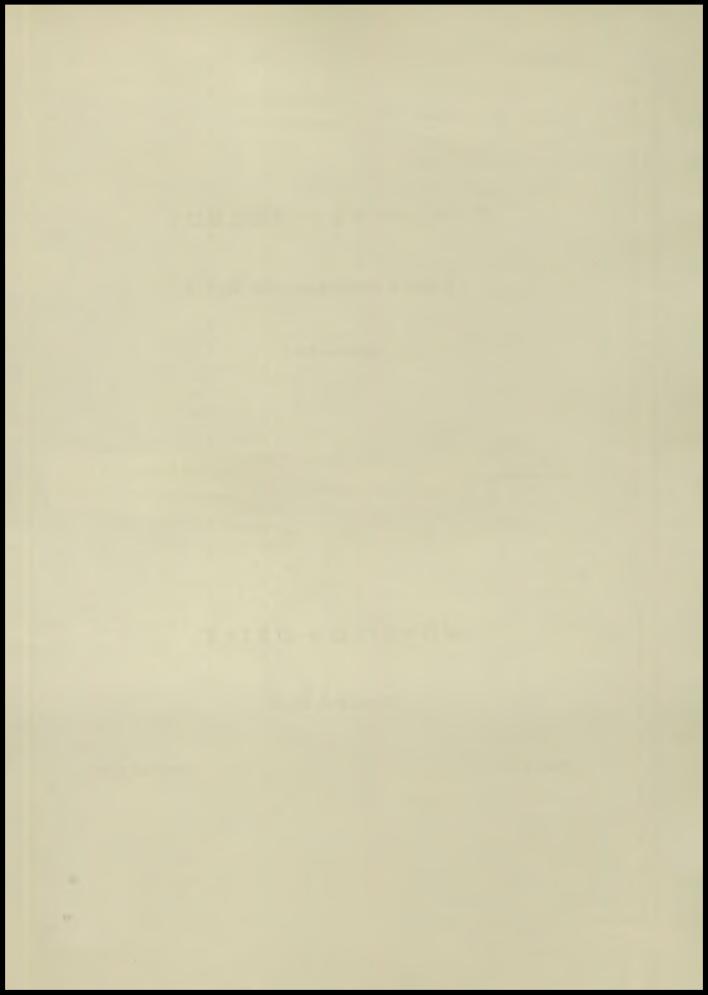

The team, as a whole, was inexperienced and had not played together previously. This made it difficult for them to get started, but everyone had the desire to improve his play, and by the end of the season, Coach Schuler and his team were well on the road to success. They should make an impressive record next season.

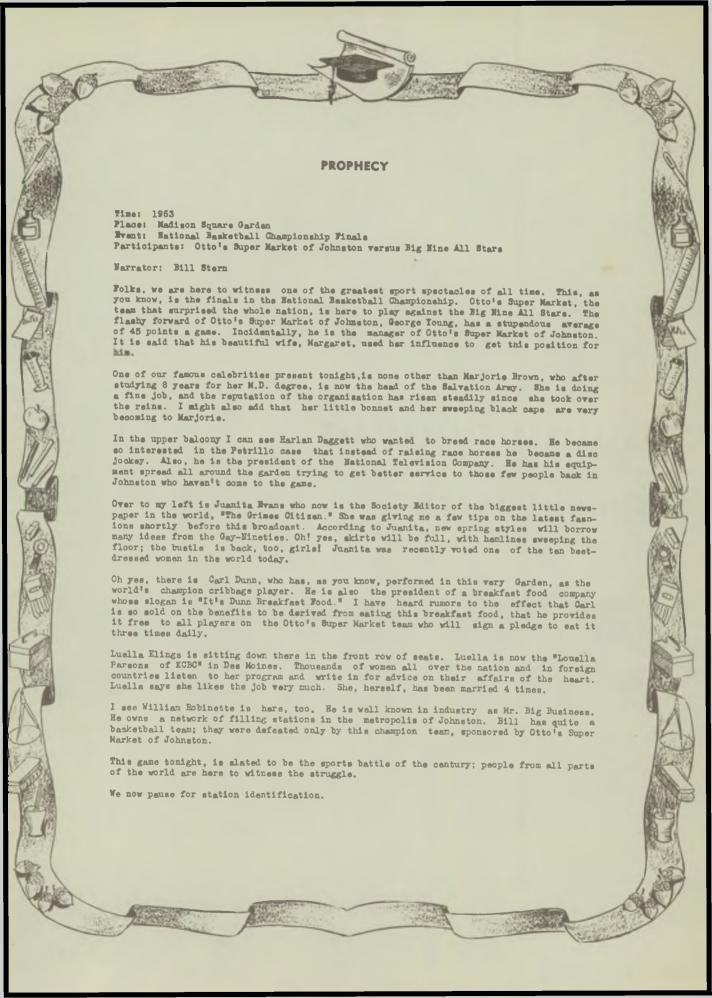

BASEBALL

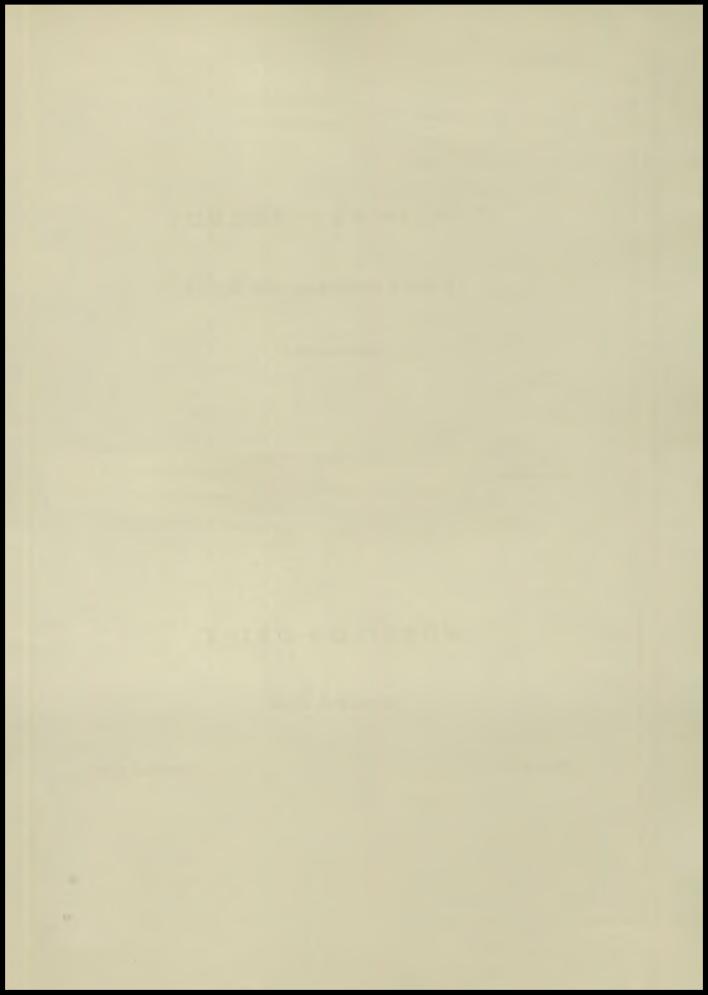

We expect about 20 men to report for baseball this spring. They will play an 8 game schedule. This year the team's morale has received an extra boost by the purchase of badly needed new suits.

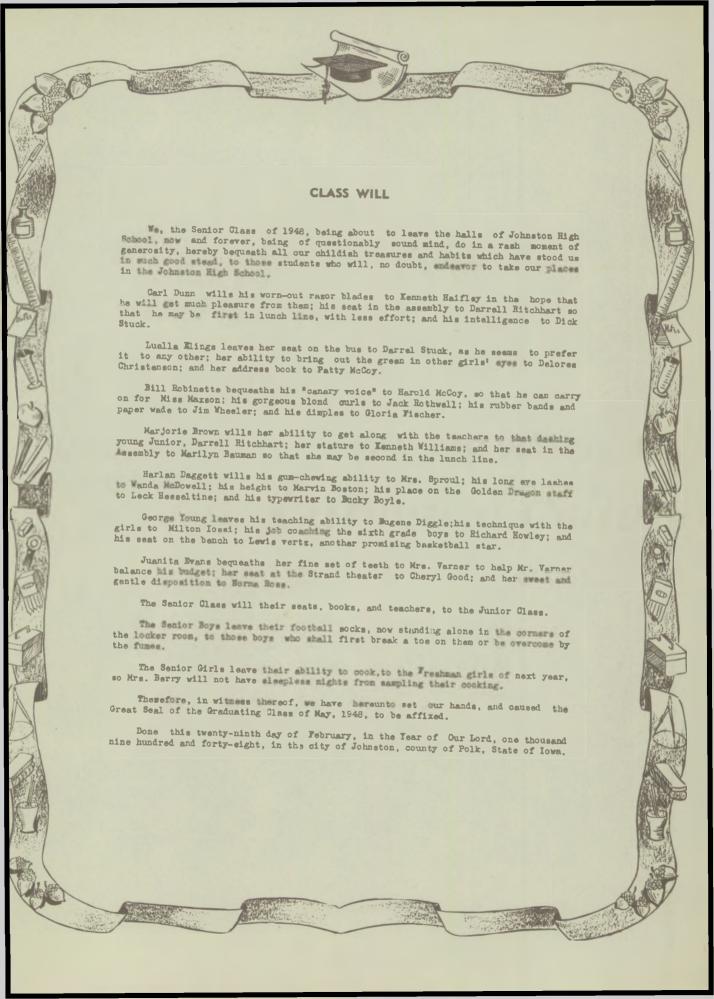

TRACK

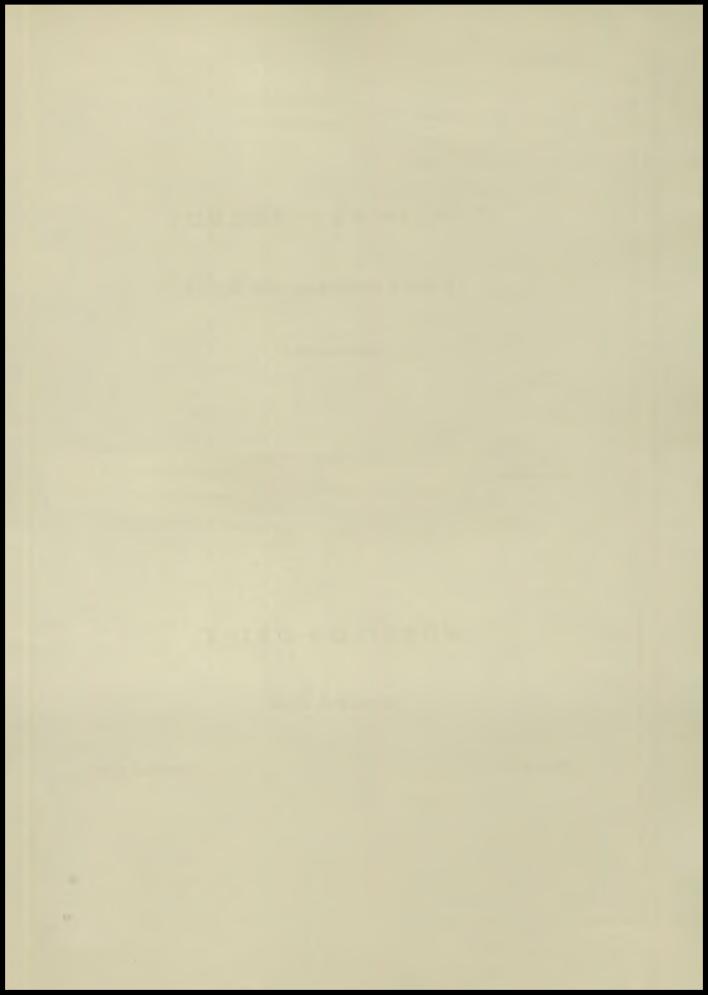

Track is being revived at Johnston after a lapse of several years. A number of boys have expressed a desire to have a team, and will be entered in some meets this spring if their interest continues.

PIONEER BUILDINGS AT JOHNSTON

This photo shows only the small portion of the 1,100 acre Pioneer farm where most of the buildings are centered. It does not include the laboratory, machine shop, east farm, west farm, or Dickey farm. The buildings shown are (1) Hy-Line buildings, (2) horse barn, (3) dairy farn, (4) Newlin home, (5) parent corn plant, (6) old farm office, (7 and 8) parent corn storage building, (9) auxiliary drying plant, (10) planter plate calibration building, (11) fire house, (12 and 13) miscellaneous storage buildings, (14) building for mixing treating dust.

In 1926, Pioneer built the first seed plant to handle hybrid corn exclusively . . . at Johnston, Iowa. Its corn breeding work started in 1913 and was transferred to Johnston in 1923 where the headquarters for the Corn Belt wide Pioneer corn breeding program is located.

What Are They?

Hy-Line Chicks are the first true hybrid chicks to be offered commercially to farm poultry raisers. They are bred by following the same general principles that are used so successfully to produce hybrid corn.

What's Back of Them?

Hy-Line Chicks are the product of extensive research and a staff of skilled poultry breeders. An investment of several hundred thousand dollars has been put into their production. The first poultry inbreeding was started at Hy-Line Poultry Farms in 1935. Seven years later the first proven Hy-Line Chicks were offered commercially to poultry raisers.

What Will They Do?

Hy-Line pullet chicks develop into prolific farm layers. In actual tests, they have laid from three to six dozen more eggs per bird per year than the standard-breds against which they were tested. Hy-Line cockerel chicks make fast feathering, fast growing broilers. They average approximately three pounds each at 12 weeks of age.
